20°C Smoke Search ENG IN 9:59 PM 12/2/2024

The screenshot shows the Apache JMeter interface with a Thread Group named "View Results in Table". The left sidebar lists various test elements under categories like login, register, ss, patient, dashboard, bookdoctor, pendingappointment, pastappointment, patientprofile, signghospital, admin, admindashboard, and admiprofile. The main panel displays the results of the "View Results in Table" element, showing a table with 25 rows of sample data. The columns include Sample #, Start Time, Thread Name, Label, Sample Time(ms), Status, Bytes, Sent Bytes, Latency, and Connect Time(ms). All samples have a status of "OK" (green) and a latency of 0 ms. The bottom of the screen shows navigation icons and a system tray.

Sample #	Start Time	Thread Name	Label	Sample Time(ms)	Status	Bytes	Sent Bytes	Latency	Connect Time(ms)
1	21/47:15.817	Thread Group 1-1		0	OK	875	0	0	0
2	21/47:16.269	Thread Group 1-3		0	OK	875	0	0	0
3	21/47:16.417	Thread Group 1-2		0	OK	875	0	0	0
4	21/47:16.419	Thread Group 1-5		0	OK	875	0	0	0
5	21/47:16.428	Thread Group 1-7		0	OK	875	0	0	0
6	21/47:16.912	Thread Group 1-4		0	OK	875	0	0	0
7	21/47:17.160	Thread Group 1-6		0	OK	875	0	0	0
8	21/47:17.280	Thread Group 1-10		0	OK	875	0	0	0

Ease of use

The screenshot shows the Lighthouse Report interface. At the top, there are dropdown menus for 'View: Lighthouse Report' and 'Tools: Export'. A sidebar on the right displays the site's logo ('Sarathi For Humans') and a note about Lighthouse running in Chrome. Below the header, a section titled 'Lighthouse Report' is shown with a red icon. A note explains that Lighthouse is an open-source tool for improving web page quality, available for public pages or those requiring authentication. It also mentions that scripted tests will only be available on the final step. Below this, a navigation bar includes tabs for Performance (76), Accessibility (85), Best Practices (96), SEO (85), and PWA (38). The main content area is titled 'Performance' and shows various metrics with their scores: First Contentful Paint (4.2s), Speed Index (4.0s), Largest Contentful Paint (4.2s), Time to Interactive (4.6s), Total Blocking Time (10ms), and Cumulative Layout Shift (0.009). A note at the bottom states that values are estimated and may vary.

Site Performance

The screenshot shows the Performance Summary interface. At the top, there are dropdown menus for 'View: Performance Summary' and 'Tools: Export, Re-Run Test'. A sidebar on the right displays the site's logo ('Sarathi For Doctors') and a note about having free experiments available. Below the header, a section titled 'Performance Summary' is shown with three columns: 'Is it Quick?', 'Is it Usable?', and 'Is it Resilient?'. Each column contains a note and a note icon. The 'Is it Quick?' section notes that the site was quick to connect and deliver initial code but had rendering content with little delay. The 'Is it Usable?' section notes good layout stability but had accessibility issues. The 'Is it Resilient?' section notes no render-blocking 3rd party requests but had security issues. Below these sections, a large box titled 'Page Performance Metrics' lists various metrics: Time to First Byte (.896s), Start Render (3.700s), First Contentful Paint (3.736s), Speed Index (3.737s), Largest Contentful Paint (3.736s), Cumulative Layout Shift (.013), Total Blocking Time (.105s), and Page Weight (359 KB). A note at the bottom states that metric availability will vary.
